PROFESSIONAL SUMMARY

Results-driven Junior Front-End Developer with a background in Management Information Systems and intensive hands-on training through the Digital Egypt Pioneers Initiative (DEPI). Specialized in building responsive, accessible, and performance-optimized web applications using React.js, JavaScript (ES6+), HTML5, and CSS3. Combines strong business acumen with technical expertise to deliver digital experiences aligned with user needs and business goals. Proven ability to convert UX/UI designs into clean, maintainable front-end code and collaborate effectively within agile, Git-based development teams.

EXPERIENCE

Frontend Developer Trainee

Digital Egypt Pioneers Initiative (DEPI) | November 2024 – Present | Alexandria, Egypt

- Develop and deploy responsive user interfaces using HTML5, CSS3, Bootstrap, and modern JavaScript/TypeScript.
- Convert UX/UI design mockups into pixel-perfect, maintainable front-end components.
- Build modular, reusable React.js components and implement state management using React Hooks.
- Utilize Git and GitHub for version control, feature branching, and collaborative code reviews.
- Integrate RESTful APIs using Node.js and Express.js to connect front-end with back-end services.
- Containerize development environments and small applications using Docker.
- Write unit tests and maintain technical documentation to ensure code reliability.
- Follow clean code principles, component-based architecture, and consistent styling conventions.

Human Resources Member (Volunteer)

Enactus – Alexandria University | February 2024 – October 2024 | Alexandria, Egypt

- Monitored and evaluated member performance, providing structured feedback to drive continuous improvement.
- Managed internal communications ensuring all members were informed of policies, procedures, and events.
- Organized team-building activities and internal engagement programs to foster collaboration.
- Supported HR operations across cross-functional teams in a fast-paced student organization.

EDUCATION
